

EPIDEMIOLOGIST I – WV CANCER REGISTRY

REQUIREMENTS:

A Master's degree in epidemiology, public health, biology, physical, behavioral, natural, or veterinary sciences from an accredited college or university or graduation from an accredited school of nursing with state licensure AND three years of full-time or equivalent part-time paid experience in conducting epidemiology.

SUBSTITUTION:

Bachelor's degree in biology, physical, behavioral, or natural sciences from an accredited college or university, AND two years of full-time or equivalent part-time paid experience in conducting epidemiology including disease investigation, risk assessment or environmental training. For arboviral entomologist: training – Master's degree from an accredited college or university in entomology or biology. Experience – one year of full-time or equivalent part-time paid experience in entomology.

NATURE OF WORK:

Under general supervision, performs data analysis necessary to describing the burden of cancer in West Virginia including developing and implementing data quality initiatives, assessing educational needs of data providers and other partners, evaluation the impact of educational and data quality initiative, and participating in cluster investigations. Implements studies in collaboration with more senior epidemiologists; provides educational resources to cancer reporters, public health, medical, and government officials, and members of the public; trains and provides consultation to local health department personnel; works collaboratively with other epidemiologists and other health professionals as well as the general public. Both in-state and out-of-state travel is required.

SALARY: \$35,028 to 64,812
