JOB INFORMATION

Position Type: Job

Seeking: MPH,PhD

Specialization: BIO,HBHP

Position Title: Senior Research Project Professional

Location: Chicago, IL

Salary Range: Dependant on qualifications

Position Description: The Senior Research Project Professional support research in three cross-cutting program areas relating to family planning: Adolescent reproductive health (contraception, pregnancy, sexuality, new media); Abortion (women's decision making, clinical care and affects of policy on adolescents and low income women) and safe motherhood (family planning, postpartum maternal hemorrhage, postpartum contraception, and sexually transmitted infection, birth spacing). This position will actively facilitate the design, development and execution of qualitative and quantitative research projects. Apply skills and expertise to contribute high-level background research, writing and data analysis to advance the development of projects from design through publication phases. Provide leadership in research efforts and pursuing funding opportunities. Contribute to and prepare presentations, media, and curricular materials relating to the research projects. Supervise research team on a day-to-day basis. Lead policy analysis and produce the statistical section of federally funded grants. Design work assignments and oversee progress of studies. Handle highly sensitive information and maintain strict confidentiality.

Additional Information: Qualifications: - Master's degree or higher in a field of study relevant to the research being conducted (e.g., Public Health, Health Studies, epidemiology, Social Work, Sociology, Psychology, Anthropology or related field) required, PhD preferred. - Three years of experience in field relevant to the research being conducted preferred - Post-graduate experience with quantitative research methods required; - Strong biostatistical skills including excellent quantitative skills and experience required (e.g., SAS or STATA); - Experience with collecting and analyzing qualitative data required; - Experience with grant writing required; - Excellent interpersonal skills; - Ability to work independently, work on multiple studies simultaneously and self motivate required. - Demonstrated proficiency in academic writing required and some history of publication-writing and development; - Ability to handle and relate sensitive information and work with minimal supervision required; - Excellent organizational, verbal and written skills required; - Fluency in Spanish preferred. - A resume, cover letter, writing sample and reference contact information are required to be considered for this position - Applicants must also apply online at <http://jobs.uchicago.edu> under requisition # 082748
