

Mark H. Weir EIT Ph.D.

Associate Professor - With Tenure

Division of Environmental Health Sciences, College of Public Health

Core Faculty Member - Sustainability Institute

Co-Director: Ecology Epidemiology and Population Health Theme, Infectious Diseases Institute

The Ohio State University, 1841 Neil Ave, Cunz Hall - 426, Columbus, OH, 43210

Lieutenant (O3) - United States Navy - Medical Service Corps

E-mail: weir.95@osu.edu; Telephone: 001-614-292-4066; Website: <https://cph.osu.edu/people/mweir>

EDUCATION

Environmental Engineering, PhD. Drexel University, 2009

Concentrations: Environmental and engineered systems modeling, Quantitative Microbial Risk Assessment (QMRA)

Dissertation: Development of Physiologically Based Pathogen Transport and Kinetics Model for Inhalation of *Bacillus anthracis* Spores

Environmental Engineering, B.S. Wilkes University, 2004

Concentrations: Novel water treatment, water distribution modeling, design

Published Senior Project: Modeling Leakage Reduction Through Pressure Control

PROFESSIONAL LICENSE

Engineer in Training, Pennsylvania. Issued on 12 April 2003, License Number EToo4493

PROFESSIONAL POSITIONS

Associate Professor

Jan 2023 - Current

Division of Environmental Health Sciences, College of Public Health

The Ohio State University

Environmental Health Officer - Current Rank: LT (O3)

Nov 2022 - Current

United States Navy Reserve

Assistant Professor

Aug 2016 - Dec 2022

Division of Environmental Health Sciences, College of Public Health

The Ohio State University

Senior Lecturer

Nov 2016 - Current

College of Medicine

Griffith University

Adjunct Assistant Professor

Feb 2017 - Current

Mel and Enid Zuckerman College of Public Health

University of Arizona

CTO & Senior Research Engineer

Oct 2012 - Sept 2022

CAMRA Consultants LLC.

Acting Director of Environmental Health Division

Dec 2013 - July 2016

Division of Environmental Health Department of Epidemiology and Biostatistics

Temple University

Assistant Professor*Oct 2012 - July 2016*

Division of Environmental Health Department of Epidemiology and Biostatistics
Department of Civil and Environmental Engineering
Temple University

Environmental Engineer*Sept 2011 - Sept 2012*

Office of Water, United States Environmental Protection Agency

Associate Director & Visiting Research Associate*Sept 2009 - Sept 2011*

Center for Advancing Microbial Risk Assessment (CAMRA), Department of Fisheries and Wildlife
Michigan State University

Graduate Assistant*Sept 2004 - Sept 2009*

Department of Civil Architectural and Environmental Engineering, Drexel University

Co-Instructor*Sept 2005 - May 2009*

Department of Civil Architectural and Environmental Engineering, Drexel University

Teaching Assistant*Sept 2005 - May 2009*

Department of Civil Architectural and Environmental Engineering, Drexel University

Laboratory Assistant*Sept 2000 - Dec 2003*

Department of Environmental Engineering and Earth Sciences, Wilkes University

RESEARCH**Brief Research Statement**

I am an Environmental Engineer who focuses on the development of both computational methods and models for mechanistic risk analysis within environmental systems. I am PI of the Engineering Better Decisions (EBD) Laboratory at the Ohio State University, and we focus on the quantitative methods needed to use data better, model systems better, and use those methods and models to inform better decision making. I am a computational methodologist with focus on food safety, drinking water quality, and healthcare associated infections. As a core faculty member of the Sustainability Institute at OSU, I focus EBD's research on convergent science and topics addressing future challenges in environmental engineering and health. To briefly generalize, we are working with colleagues on computational methods using frequentist and Bayesian (including hierarchical approaches) to research the following grand challenges: a.) understand how multiple exposures interact in human organ systems, b.) quantify how ambient and human gut microbiomes influence a hazard's health effect, and c.) how engineering and clinical decisions influence exposures and the probability of a health effect.

My research has been continually funded since and including graduate school and has continued to be supported from a diverse portfolio of funders and supporters. Through a mixture of sole-PI, but mostly collaborative teams just in my time at OSU I have generated \$12,350,000 in total research funds to-date. Funds expended by my laboratory alone has been \$1,300,000 to-date. When including my total research career at OSU, Temple University, Michigan State University, Drexel University, and prior consulting work I have worked with collaborative teams to generate just under \$19,000,000 in total research funds. My consistency of funding is due in part to my success as a collaborative scientist, and because there are extension components to my research outputs. Thus, I can diversify contractual and traditional grant mechanisms for funding, and have recently closed my private businesses to enhance this ability to operate funded contracts through OSU. I am most interested in expanding and refining computational methodologies for mechanistic risk modeling within systems of systems

which my funding and publication record demonstrates. Consequently, I am seeking a position focused primarily on research to advance my scientific goals and impact.

| COVID-19 Wastewater-Based Epidemiology (WBE) for RPM International Objective: implement WBE for 10 Ohio facilities to support staffing decision making. | RPM International | \$386,000 | Jan 2021 - June 2021 | PI |
| COVID-19 Coronavirus Relief Fund: State of Ohio Wastewater SARS-CoV-2 Surveillance Objective: Collaboratively initiate the OH WBE surveillance network throughout OH. | OH Environmental Protection Agency | \$1,790,785 (\$31,561) | July - Dec 2020 | Co-PI |
| Development of QMRA Modeling Capacity and <i>Legionella pneumophila</i> Risk Model Development Objective: Develop QMRA modeling capacity at NSF International and support the development of a building water safety office until leadership can be found for the office. | National Sanitation Foundation | \$138,000 (\$138,000) | 2017 - 2020 | PI |
| QMRA III - Quantitative Microbial Risk Assessment Interdisciplinary Instructional Institute Objective: Develop online and in-person learning curriculum and materials, and ease of use risk modeling apps to broaden the practitioner and research community in QMRA. | NIGMS | \$791,506 (\$250,000) | 2014 - 2020 | PD |
| Combined Surface Sampling and QMRA Modeling to Optimize Surface Cleaning Targeted HAI Reduction. Objective: Quantify environmental exposure of patients to HAI pathogens and cleaning interventions and develop a set of QMRA models to facilitate intervention simulations. | CDC | \$510,000 (\$150,000) | 2018 - 2019 | PI |
| An Integrated Strategy to Improve Green Infrastructure Approaches in Philadelphia. Objective: Develop a triple bottom line model to assess and forecast the overall health and environmental improvements from green stormwater infrastructure. | USEPA | \$1,000,000 (\$200,000) | 2014 - 2018 | Co-PI |
| Grants Funded Prior to Appointment at The Ohio State University (6) | | | | |
| Sustainable Sanitation: Non-Western Approaches to Enhance Pathogen Control from Human Excreta. Objective: Develop a critical base of primary and computational data through QMRA models to understand innovative water treatment for Latin America. | P&G Inc. | \$600,000 (\$200,000) | 2014 - 2018 | PI |
| Disinfection and Pretreatment Proposed Redesign for Increased Variable Water Quality Parameters and Pathogenic Microorganisms. Objective: Evaluate a QMRA application and model developed for the Alberta Ministry and Calgary Water. | Alberta - Minister of Environmental and Sustainable Resource Development | \$15,000 (\$15,000) | 2014 - 2015 | PI |
| Stochastic Modeling of Hazardous Material Transport and Detection in Urban Gardens and Small Scale Agriculture. Objective: Quantify health risks associate with toxins and metals drawn into edible portions of plants. | P&G Inc. | \$400,000 (\$100,000) | 2013 - 2015 | PI |
| Design and Evaluation of Sustainable Storm Water Infiltration Structures for Hazardous Waste Control. Objective: Evaluate and fix issues identified with a QMRA model developed for a water resources project in Queensland Australia | CH ₂ M Hill Australia. | \$40,000 | 2011 - 2012 | PI |
| Forecasting Beach and Nearshore Health Effects Using QMRA. Objective: Develop a QMRA modeling app to forecast risk to beach users on three beaches in the Great Lakes. | USEPA | \$65,000 | 2010 - 2012 | Co-PI |
| Development of a Physiologically Based Pathogen Transport and Kinetics Model for Inhalation of Pathogens. Objective: Develop an innovative means of dose-response modeling that accounts for mechanisms of transport for <i>Bacillus anthracis</i> spores into human lungs. | DHS | \$20,000 | 2008 - 2010 | PI |

RESEARCH CONSORTIA FOUNDED

International Public Health Risk Analysis Consortium (PHRAC)

CoFounder with Marc Verhougstraete Ph.D. of University of Arizona, and Jesse Miller of Neogen Corporation. Founded in 2017 with the mission of impact-focused international health-based risk research collaboration and community level emergency response.

Accomplishments to date:

- Initiation of surface sampling and modeling initiation project
- Development of QMRA best practices guidelines and guiding documents

Healthcare Infection Transmission Systems [HITS](#)

Founder and board officer since 2017. Founded with primary leadership from Christine Greene Ph.D. of NSF International. Mission is to develop collaborative fundamental and applied research in an international and non-competitive environment to work towards the elimination of healthcare associated infections.

Accomplishments to date:

- First conference hosted in Ann Arbor in 2017 - 150 attendees, over 3 days
- Establishment of working groups in 2017 to target research funding options
- Chair of Water Working Group - Mark H. Weir Ph.D.
- Co-Chair of Risk Working Group - Mark H. Weir Ph.D.

Quantitative Microbial Risk Assessment (QMRA) Wiki - [QMRAWiki](#)

CoFounder with Jade Mitchell Ph.D. of Michigan State University. The QMRAWiki is a combination of a QMRA social network and data/model repository with learning modules contained within.

Accomplishments to date:

- Completion of microbial dose-response data and model compendium
- Establishment of the QMRA research and learning apps and tools
- Expansion to 200 unique non-bot members and users
- Linkage with NIGMS R25 QMRA institute

CONFERENCE PRESENTATIONS - ¹ - represents presenter

1. Hoque, S ¹., **Weir, M.H.**, Seong, D., Mitchell, J. Computational Fluid Dynamics Simulations Informing Risk: Implications About Viral Transmission in School Rooms. Society for Risk Analysis Annual Meeting. San Antonio, TX (online) Dec 2020
2. Lewis, M ¹., **Weir, M.H.** Incorporation of Pre-Exposure Antibiotic use in *Clostridioides difficile* Dose-Response Model. Society for Risk Analysis Annual Meeting. San Antonio, TX (online) Dec 2020
3. Wilson, A.M ¹., **Weir, M.H.** Assessment of the Dose-Response and its Use for Quantifying Safe Shift Procedures for Healthcare Workers During the COVID-19 Pandemic. Society for Risk Analysis Annual Meeting. San Antonio, TX (online) Dec 2020

TEACHING and MENTORING

Course Designer and Director

- **Quantitative Microbial Risk Assessment Modeling.** Graduate level introduction to and use of the methods and tools of microbial risk assessment modeling using a PBL method, where R programming is taught in tandem. Offered to mixed majors at both Temple University and The Ohio State University
- **Advanced Computational Methods in Engineering and Public Health.** Graduate and honors undergraduate level, with new development for senior undergraduate students in 2019. Introductions to and use of the following methods in the cross-over of engineering and public health: simulation techniques, stochastic modeling, data visualization, advanced data analyses, decision analytics, and differential equation solving. Offered to mixed majors at Temple University and being redeveloped for The Ohio State University.
- **Foundations in Environmental Health Science.** Separate graduate and undergraduate courses. Provide the foundational knowledge required to bridge environmental sciences/engineering with environmental health concepts. Developed and successfully delivered at both Temple University and The Ohio State University. At OSU this course was completely redeveloped for asynchronous online education with consistent success.
- **Water Distribution Systems.** Undergraduate course in design and operation of water distribution systems for drinking water in urban areas. The course focuses on the fundamental knowledge required from fluid dynamics as well as use of design software for a PBL portion of the course at Temple University.

- **Biological Unit Operations.** Graduate and senior-level undergraduate course intended to develop a deeper understanding of the design and operation of biological reactors in water and wastewater treatment. Offered at Temple University
- **Water and Wastewater Treatment.** Undergraduate course developed for the design and operation of water treatment and wastewater treatment plants. Examples and PBL projects are designed around both developed and developing nation requirements. This course was developed at Temple University.
- **Environmental Fate and Transport.** Junior or senior-level undergraduate course intended to develop the skills required to quantify how chemical and microbial contaminants change in space and time in the environment. Developed at Drexel University, further refined at Temple University.
- **Groundwater Hydrology.** Graduate level course to understand the mechanisms of water transport and reaction kinetics in aquifers and subsurface flows. Developed as traditional lecture delivery at Temple University

Courses Taught at The Ohio State University

- **Primary Instructor**

- Principles of Environmental Health Science (PUBHEHS 6310) 3 credits, graduate, Autumn 2017, 2019, 2020
- Principles of Environmental Health Science (PUBHEHS 6310 *Distance Learning*) 3 credits, graduate, Spring 2017 - 2021, Autumn 2018, 2021
- Quantitative Microbial Risk Analysis Modeling (PUBHEHS 7375) 3 credits, graduate, Spring 2019, 2020

- **Team Teaching**

- Advanced Environmental Health Science (PUBHEHS 6315; 12% contribution) 3 credits, graduate, Autumn 2017, 2018, 2019, 2020
- Principles of Environmental Health Science (PUBHEHS 6310; 12% contribution) 3 credits, graduate, Autumn 2016
- Environmental Risk Assessment (PUBHEHS 3320; 6% contribution) 3 credits, undergraduate, Autumn 2016, Spring 2017, Autumn 2017
- Principles of Risk Assessment (PUBHEHS 7365; 6% contribution) 3 credits, graduate, Autumn 2016, S 2017
- Exposure Science Monitoring Techniques (PUBHEHS 7380; 2% contribution) 3 credits, graduate, Autumn 2016
- Exposure Science Monitoring Techniques (PUBHEHS 7380; 6% contribution) 3 credits, graduate, Autumn 2017, Autumn 2018

FACULTY & STAFF MENTORED

| Location | Name | Research Area | Years Active | Notes |
|----------------------------|----------------------|--|----------------|--|
| Faculty | | | | |
| The College of New Jersey | Alexis Mraz Ph.D. | Environmental systems and risk modeling for premise plumbing pathogens | 2020 - current | As an Assistant Professor, I am assisting in her mentorship for high quality instruction and development of her research program |
| Temple University | Lok Pokhrel, Ph.D. | Environmental nanomaterials in water quality technology, research and environmental health and engineering instruction | 2014 - 2017 | Focused on development of his research program whilst carrying a heavy teaching load. Lok is now an Assistant Professor at East Carolina University |
| Temple University | Susan Mirlohi, Ph.D. | Chemical hazard water quality with special emphasis on taste and odor impacting compounds | 2015 - 2018 | Focused on introducing her research into the classroom and environmental health curriculum needs. Susan is now an Assistant Professor at California State University, Fresno |
| Research Staff and Faculty | | | | |
| Temple University | William Flynn MPH | Environmental modeling and software development for multiple audiences | 2014 - 2019 | Focused on the development of environmental and risk modeling software for broader use. William is now a research staff member at the Children's Hospital of Philadelphia |
| Temple University | Uma Nair, Ph.D. | Environmental exposures to cigarette and e-cigarette smoke/vapor | 2014 - 2016 | Focused on environmental dynamics of cigarette smoke transport indoors. Uma is now an Assistant Professor at the University of Arizona |

STUDENTS MENTORED

| Role | Student Name | Degree & School | Graduation Year | Thesis/Project |
|---|--------------------|--|-----------------|--|
| Doctor of Philosophy | | | | |
| Advisor | Juan Xu | Environmental Sciences OSU | 2025 | New student - project on relative risk balancing and biofilm microbial ecology dynamics |
| Advisor | Madeline Lewis | Epidemiology, OSU | 2023 | Thesis in development, focusing on antibiotic pre-exposure effects on <i>Clostridioides difficile</i> risks for patient cohorts. |
| Advisor | Pattama Ulrich | Environmental Science OSU | 2022 | Assessment of nature based solutions as a component in food product and environmental health protection in Ethiopian abattoirs |
| Co-Advisor | Sonya Kozak | Environmental Health Griffith University | 2020 | Development and Validation of a Method to Couple Microbial Source Tracking and Risk Assessment for Recreational Exposures |
| Advisor | Alexis L. Mraz | Environmental Health, OSU | 2018 | Forecasting in the Unseeable: A Mixed Methods Model of Planktonic and Biofilm-Bound <i>Legionella pneumophila</i> in Building Water Systems |
| Mentor & Committee Member | Soledad R. Alvarez | Environmental Engineering Universidad Nacional de Salta | 2017 | Use of Risk Analysis in Water Reuse System Design and Optimization |
| Masters of Public Health & Masters of Science | | | | |
| Advisor | Madeline Lewis | MPH Epidemiology | 2020 | Mechanistic modeling shift in dose-response from patient pre-exposure to <i>Clostridioides difficile</i> |
| Advisor | Makala Fioritto | MPH Environmental Health | 2021 | Culminating in development - focusing on firefighter health risks from controlled wildfire burns smoke exposure |
| Advisor | Julia Doncaster | MPH Environmental Health OSU | 2020 | Modeling Risks from <i>Acinetobacter baumannii</i> in Healthcare Environments. |
| Advisor | David Hibler | MS Environmental Health OSU | 2020 | Mechanistic modeling of the combined commensal and inhibitory effects of drinking water biofilm ecology on the growth of <i>Legionella pneumophila</i> . |

| Role | Student Name | Degree & School | Graduation Year | Thesis/Project |
|-----------------------------|---------------------|--|-----------------|---|
| Advisor | Traven Wood | MS Environmental Health OSU | 2019 | Predictive Modeling of Microcystins in Drinking Water Treatment Systems and their Related Health Effects. |
| Advisor | Jasmine Lin | MPH Environmental Health OSU | 2019 | Modeling the Dose-Response and Health Risks from MRSA and <i>Clostridioides difficile</i> in Health-care Environments. |
| Advisor | Wanyu Huang | MS Environmental Science OSU | 2018 | Modeling the Health Improvement Capabilities of Green Stormwater Infrastructure |
| Co-Advisor | Tamka Jones | MS Environmental Engineering Temple University | 2017 | Efficacy of Biofuel Processing for Wastewater Treatment |
| Advisor | Dishani Shah | MS Environmental Health Temple University | 2017 | Aqueous Chemistry and the Survival of Pathogens in the Natural Environment |
| Co-Advisor | Claudia Setubal | MS Environmental Health Temple University | 2016 | The Role of Subsurface Chemistry on the Persistence and virulence of Pathogenic <i>Escherichia coli</i> |
| Advisor | Jamie Minich | MS Environmental Health Temple University | 2015 | Development of Runoff and Infiltration Model for Improved Prediction of Surface and Groundwater Impacts of <i>Mycobacterium avium</i> |
| Advisor | Kirk Breuninger DVM | MPH Environmental Health Temple University | 2014 | Development of a Water & Foodborne QMRA Model for Bovine and Human Risk from <i>Mycobacterium paratuberculosis</i> |
| Bachelors of Science | | | | |
| Research Mentor | Sophia Matts | BS Public Health EHS OSU | 2021 | In development - focus on COVID-19 wastewater-based epidemiology |
| Research Mentor | Geordee Spilkia | BS Environmental Science Temple University | 2016 | Personal air quality sensors and assessment of microbiological data |
| Research Mentor | Hillary Cuesta | BS Public Health Temple University | 2015 | Cyber learning for water quality and treatment |
| Research Mentor | Steven Kaspin | BS Biology Temple University | 2015 | Cyber learning in environmental sciences and health |
| Research Mentor | Kelsey Balfour | BS Environmental Science Temple University | 2015 | Laboratory techniques, health and environmental kinetics modeling. |
| Research Mentor | Taiwo Adewunmi | BS Environmental Engineering Temple University | 2015 | Laboratory techniques, health modeling and Design. |
| Research Mentor | Brian M. Panzl | BS Microbiology Michigan State University | 2011 | Laboratory techniques and computational model and computer application development. |

CONFERENCE/WORKSHOP ORGANIZATION

Meeting Organization

1. Department of Homeland Security, Science and Technology, University Summit. 2021 Summit Planning Committee.
2. Society for Risk Analysis Annual Meeting. San Antonio, TX (online) Dec 2020. Annual Meeting Organization Committee and Abstract Reviewer
3. OSU Water Research Forum. Hosted by the Sustainable, Resilient Economies (SRE) Discovery Theme. Columbus, OH November 2016
4. All Principle Investigator Meeting. Center for Advancing Microbial Risk Analysis (CAMRA). Washington DC. March 2011
5. All Principle Investigator Meeting. CAMRA. East Lansing, MI. May 2010
6. All Principle Investigator Meeting. CAMRA. Cincinnati, OH. Oct 2009

Workshop Organization

1. Future Needs of QMRA Research and Professionals: A Workshop. Co-planned with Drs. Joan B. Rose (MSU), Kerry Hamilton (ASU), and Jade Mitchell (MSU). I supported goals, attendee list, agenda setting and execution of the workshop.
2. Quantitative Microbial Risk Assessment Interdisciplinary Instructional Institute (QMRA III). Columbus, OH. Aug 2019. Co-planned with Dr. Jade Mitchell (MSU), workshop logistics, curriculum, and instructional material.
3. QMRA III. Columbus, OH. Aug 2018. Co-planned with Dr. Mitchell, workshop logistics, curriculum, and instructional material.
4. QMRA III. Seattle, WA. Aug 2017. Co-planned with Dr. Mitchell and Dr. J. Scott Meschke (University of WA), workshop curriculum, and instructional material.
5. Public Health Risk Analysis Consortium (PHRAC) Inaugural Meeting. Side Event of The UNC Water Microbiology Conference. Chapel Hill, NC. May 2017. Co-planned with Dr. Marc Verhougstraete (University of Arizona) workshop planning and material.
6. The Evolution of Quantitative Microbial Risk Assessment: How to Fully Realize its Contribution to Water Policy and Human Health Risk Reduction. Side Event of The UNC Water Microbiology Conference. Chapel Hill, NC. May 2017. Co-planned with Dr. Anna Aceituno (RTI International), workshop logistics, guest speaker invitation and presentation materials.
7. QMRA III. Columbus, OH. Aug 2016. Co-planned with Dr. Jade Mitchell, workshop logistics, curriculum, and instructional material.
8. QMRA III. Columbus, OH. Aug 2015. Co-planned with Dr. Jade Mitchell, workshop logistics, curriculum, and instructional material.
9. QMRA III. Columbus, OH. Aug 2015. Co-planned with Dr. Jade Mitchell, workshop logistics, curriculum, and instructional material.
10. Health Risk Analysis for the Risk Professional. Society for Risk Analysis Annual Meeting. Denver, CO. Dec 2014. Co-planned with Dr. Mitchell and Dr. Patrick Gurian (Drexel University) on workshop logistics, curriculum and lecture materials & breakout activities.
11. Teaching Quantitative Microbial Risk Assessment in Environmental Engineering and Science. Association of Environmental Science and Engineering Professors, Education and Research Conference. Tampa, FL. July 2011. Co-planned with Dr. Patrick Gurian and Dr. Charles N. Haas (Drexel) on workshop curriculum and materials.
12. Introduction and Use of QMRA for Addressing Safety and Security in the Water Environment: Applications for Drinking Water, Recreational Waters and Biosolids. International Water Association, World Water Congress. Montreal, Quebec, Canada, Sept 2010. Co-planned with Dr. Charles N. Haas and Dr. Joan B. Rose (MSU), curriculum and lecture material.
13. CAMRA QMRA Summer Institute. Hosted at Delft Technological University (DTU), Delft, Netherlands. June 2010. Co-planned with Dr. Gertjan Medema (DTU) curriculum, student activities and lecture materials.

14. CAMRA QMRA Summer Institute. MSU, East Lansing, MI. Aug 2009. Co-planned with Dr. Rose, logistics, curriculum, lecturers and lecture materials.

Workshop Participation (Instructor)

1. QMRA III. Columbus, OH. Aug 2019. Lectures & exercises prepared and presented: 1.) Probability and Statistics, 2.) Environmental Modeling, 3.) Markov Chain Modeling, 4.) Monte Carlo Modeling, 5.) Public Health Engineering and Mathematics: Quantifying Health Risks, 6.) R Programming, 7.) Modeling and Inclusion of Variable Uncertainty in Mechanistic Modeling
2. QMRA III. Columbus, OH. Aug 2018. Lectures & exercises prepared and presented: 1.) Environmental Modeling, 2.) Markov Chain Modeling, 3.) Monte Carlo Modeling, 4.) Public Health Engineering and Mathematics: Quantifying Health Risks, 5.) R Programming, 6.) Exposure Pathways and Modeling
3. QMRA III. Seattle, WA. Aug 2017. Lectures & exercises prepared and presented: 1.) Environmental Modeling, 2.) Markov Chain Modeling, 3.) Monte Carlo Modeling, 4.) Public Health Engineering and Mathematics: Quantifying Health Risks, 5.) R Programming, 6.) Bootstrapping for Mechanistic Dose-Response Modeling
4. QMRA III. East Lansing, MI. Aug 2016. Lectures & exercises prepared and presented: 1.) Environmental Modeling, 2.) Markov Chain Modeling, 3.) Monte Carlo Modeling, 4.) Public Health Engineering and Mathematics: Quantifying Health Risks, 5.) Crystal Ball co-taught with Dr. Michael Ryan of Drexel University.
5. QMRA III. East Lansing, MI. Aug 2015. Lectures & exercises prepared and presented: 1.) Environmental Modeling, 2.) Markov Chain Modeling, 3.) Monte Carlo Modeling, 4.) Public Health Engineering and Mathematics: Quantifying Health Risks, 5.) R Programming
6. Health Risk Analysis for the Risk Professional. Society for Risk Analysis Annual Meeting. Denver, CO. Dec 2014. Lecture prepared and presented for: Exposure Modeling in Health Risk Analysis
7. CAMRA QMRA Summer Institute. East Lansing, MI. Aug 2011. Lectures prepared and presented for: 1.) Statistics and Uncertainty, 2.) Monte Carlo and Crystal Ball, 3.) Stochastic Modeling and the Markov Processes, 4.) Public Health Engineering and Mathematics: Quantifying Health Risks, 5.) R Programming
8. Teaching Quantitative Microbial Risk Assessment in Environmental Engineering and Science. Association of Environmental Science and Engineering Professors, Education and Research Conference. Tampa, FL. July 2011. LECTURE prepared and presented for: Uncertainty Modeling in Public Health, Engineering and Risk Analysis.
9. Introduction and Use of QMRA for Addressing Safety and Security in the Water Environment: Applications for Drinking Water, Recreational Waters and Biosolids. International Water Association, World Water Congress. Montreal, Quebec, Canada, Sept 2010. Lecture prepared and presented for: Uncertainty and Exposure Modeling in Mechanistic Risk Analysis.
10. CAMRA QMRA Summer Institute. Delft Technological University. Delft, Netherlands. June 2010. Lectures prepared and presented for: 1.) Statistics and Uncertainty, 2.) Monte Carlo and Crystal Ball
11. CAMRA QMRA Summer Institute. East Lansing, MI. Aug 2009. Lectures prepared and presented for: 1.) Statistics and Uncertainty, 2.) Monte Carlo and Crystal Ball

12. CAMRA QMRA Summer Institute. East Lansing, MI. Aug 2008. Lectures prepared and presented for: 1.) Statistics and Uncertainty, 2.) Monte Carlo and Crystal Ball

Invited Lectures & Seminar Presentations

1. Wastewater for Disease Surveillance - What are the Capabilities and Future of WBE for and Beyond COVID-19. National Environmental Laboratory Accreditation Conference (NELAC) Institute. Forum on Environmental Accreditation. Wastewater Epidemiology and COVID-19 Session. January 2021
2. Environmental Considerations for COVID-19 Risks. New Albany Plains School Board. October 2020.
3. Future Directions in a Post COVID-19 World: Lessons we Should Learn from the Pandemic. SUSTAINS Learning Community - OSU. September 2020
4. Future Directions in a Post COVID-19 World: Pandemic Lessons we Need to Address. Industrial and Systems Engineering Department Retreat Keynote Lecture. July 2020
5. Making Public Health and Engineering Decisions in a Pandemic with QMRA. Hosted by EAWAG - Swiss Federal Institute of Aquatic Science and Technology. Dübendorf, Switzerland. Presented Virtually. June 2020
6. COVID-19 in Ohio: Helping to Understand and Alter the State's Curve. Sustainability Institute - OSU. April 2020
7. Building Water Quality and Health Risks - Using QMRA to Determine Management Strategies. Hosted by the Biodesign Institute, Arizona State University, Phoenix, AZ. Oct 2018
8. Smart Systems Models - Understanding how Decisions are Made under Uncertainty. Hosted by the Mel and Enid Zuckerman College of Public Health, University of Arizona, Tucson, AZ. Oct 2018
9. Case Study of Using QMRA for Engineering and Policy Decision Making. Hosted by University of Tokyo, Tokyo, Japan. May 2017
10. Smart Systems Models - Capturing System Uncertainties Through Modeling and Simulation. Hosted by the College of Engineering, Northeastern University. Boston, MA. Dec 2016.
11. Smart Water Systems - The Future of Public Health and Water Engineering. Hosted by the Faculty of Engineering, Glasgow University, Glasgow, UK. Feb 2015.
12. QMRA: The Bridge Between Environmental Engineering and Health - Presented within the course: Water and Wastewater Treatment. Department of Civil and Environmental Engineering, Temple University, Philadelphia, PA. Oct 2014
13. Water Treatment in the Developed and Developing Worlds. Presented within the course: Emergency Preparedness Response and Health. College of Public Health, Temple University, Philadelphia, PA. July 2014.
14. What is Environmental Health? - Presented within the course: Introduction to Public Health. Department of Public Health, College of Health Professions and Social Work, Temple University, Philadelphia, PA. October 2012, 2013 and 2014

15. Water Reuse Design and Optimization” Series of 4 lectures - Presented within the course: Water and Wastewater Treatment Design. Department of Civil Architectural and Environmental Engineering, North Carolina Agriculture and Technology State University, Greensboro, NC. Spring 2012
16. New Concepts in Engineering Decision Analysis: Water Treatment Processes - Presented in the course: Water Treatment Design. Department of Biosystems and Agricultural Engineering, Michigan State University, East Lansing, MI. Oct 2010

SERVICE

Current and Past Service

| Agency | Committee | Role | Duration | Input Provided |
|---|--|--------------------|-----------------------------|---|
| National State & Local | | | | |
| New Albany Plains Local Schools | New Albany COVID-19 Task Force | Inaugural Member | March 2020 - present | Inform and advise school board members and superintendent on environmental controls. Tour school and sports buildings to provide environmental assessments for: swimming, indoor sports, and classrooms. |
| Ohio Department of Rehabilitation and Corrections | Inmate environmental management advisement | Participant | April 2020 - present | Provide environmental control expertise for inmate and staff safety includes: HVAC controls and technology,, shifting changes, social distancing, surface cleaning, and indoor person density. |
| Department of the Army - Public Health Command | Ad hoc advisement group | Ad hoc advisor | March - August 2020 | Provide dose-response, and environmental exposure assessment advice to key personnel for the command. |
| Ohio Army National Guard | Ad hoc advisement group | Ad hoc advisor | September - December 2020 | Advise on environmental control and investment areas and technologies for large spaces and communal locations (e.g. school gyms and auditoriums). |
| Ohio Department of Agriculture | Poultry and meat packing worker safety committee | Inaugural Member | March 2020 - October 2020 | Environmental control recommendations to augment and replace social distancing controls that are not possible. Introduced more appropriate experts to replace myself as input extended beyond my expertise. |
| Ohio Department of Health | OSU Rapid Response Modeling Team | Inaugural Member | February 2020 - August 2020 | Support environmental transmission considerations and mentor Ph.D. student Madeline Lewis' activities. Exited regular meetings in August to focus on wastewater epi response. |
| Ohio Department of Health | Reopening assessment | Ad hoc participant | May 2020 | Supported environmental considerations for reopening businesses such as HVAC controls, social distancing, surface cleaning, and indoor person density |
| The Ohio State University | OSU Safe Return to Campus Task Force | Ad hoc advisor | June - August 2020 | Provide environmental assessment and control expertise for: classrooms, dorms, and shared spaces. |
| The Ohio State University | OSU Transportation Ad hoc advisement | Ad hoc advisor | May - August 2020 | Provide environmental assessment and control expertise for safe operation of OSU buses. |
| Professional Organizations | | | | |
| Society for Risk Analysis | Microbial Risk Analysis Specialty Group | Secretary | December 2019 - Current | Manage the calendar and communications of the committee to the membership of the specialty group |
| Society for Risk Analysis | Education Committee | Member | December 2018 - current | Support the development of online interfaces to enhance risk education globally, work towards a standardized set of curriculum recommendations for universities interested in advancing risk education |

| Agency | Committee | Role | Duration | Input Provided |
|---|---|----------|--------------------------------|---|
| Association of Environmental Engineering and Science Professors | Student Services Committee | Member | December 2017 - Current | Support the planning and execution of the student and post doc job placement and career workshops, both virtually annually and in-person biannually |
| College/Division | | | | |
| Ohio State University College of Public Health & OSU Office of Military and Veterans Services | Veterans' Student Advocate | Advisor | September 2018 - Current | Provide guidance to the volunteer student advocate for the student veteran community in the College of Public Health. Provide guidance for career development and civilian life transitioning |
| Ohio State University College of Public Health | Graduate Studies Committee | Member | December 2017 - September 2020 | Support the development of graduate student admissions and curriculum policy and provide oversight for syllabus development and approval for new and revamped courses |
| Temple University Division of Environmental Health, College of Public Health | Faculty Search Committee | Chair | April 2014 - May 2015 | Development recruitment materials, advertisements and book said advertisements, schedule phone and in person interviews, and make itinerary and accommodations for visiting candidates. |
| Temple University Division of Environmental Health, College of Public Health | Curriculum Development Committee | Chair | January 2013 - June 2015 | Lead the development of industry responsive curriculum changes to the environmental health program in the college |
| Temple University Department of Epidemiology and Biostatistics, College of Public Health | Merit Committee | Co-Chair | August 2013 - June 2015 | Develop rubrics for and completion of evaluations of 1-quarter of research-active college faculty to rank merit increases |
| University | | | | |
| Ohio State University | Conflict of Interest Committee | Member | November 2020 - Current | Support the investigation and evaluation of potential or reported conflicts of interest throughout the university |
| Ohio State University Office of Military and Veteran Services | Military and Veteran Mentorship Program | Mentor | September 2020 - Current | Provide mentorship for graduate students as they transition to civilian life and develop their careers and research experiences to enhance them |

Science Advisory Council Meetings

1. Council expert and presenter: Department of Homeland Security, Science and Technology Directorate; Homeland Security Science and Technology Advisory Committee; National Biodefense Analysis and Countermeasures Center, Frederick, Maryland, April and June 2010

Expert Panel Participation

1. Incorporating Risk Modeling Methods Into Regulatory Needs and Future Development. Hosted by the University of Tokyo, Tokyo, Japan. May 2017
2. Regulations for Water Safety: SDWA, US EPA and Flint. Engineers Foundation of Ohio. Powell, OH. Nov 2016
3. Panel Member. Sierra Club Public Meeting on Zero Emission Buses. Sierra Club Pennsylvania Chapter, Philadelphia, PA. Nov 2015
4. Panel 3 Using QMRA to Improve Human and Environmental Resilience After a Bioterrorism Attack. DHS Science and Technology Directorate Office of University Programs, Annual University Summit. Washington DC, March 2010

5. Panel 23 Advancing Exposure Science. DHS Science and Technology Directorate Office of University Programs, Annual University Summit. Washington DC, March 2009
6. Panel 28 Advancing Consequence Modeling and Decision Modeling. DHS Science and Technology Directorate Office of University Programs, Annual University Summit. Washington DC, March 2009

Session Organization

1. Microbiology of the Built Environment: Implications for Health and Design. National Council for Science and the Environment. 17th National Conference and Global Forum on Science, Policy and the Environment. Washington DC. Jan 2017
2. Panel 3, Using QMRA to Improve Human and Environmental Resilience After a Bioterrorist Attack. DHS, Science and Technology Directorate, Office of University Programs; Annual University Network Summit on Research and Education. Washington DC. March 2010

Session Chair

1. T3-B Diverse Modeling Approaches for Exposure Assessment. Society for Risk Analysis, Annual Meeting. Washington DC. Dec 2010
2. T2-H Epidemiology and Environmental Risk Assessment. Society for Risk Analysis, Annual Meeting. Washington DC. Dec 2008

OTHER PROFESSIONAL ACTIVITIES

Media Appearances

Television

1. Governor of Ohio COVID-19 Press Conference. 22 September 2020. COVID-19 and Aerosols. Televised State-wide, multiple outlets. [Ohio Channel YouTube Video 26.52 time stamp](#)
2. Governor of Ohio COVID-19 Press Conference. 23 April 2020. COVID-19: Ohio's Safe Return. Presentation and press engagement. Televised State-wide, multiple outlets. [NBC4 Columbus YouTube Video](#)
3. 10 WBNS Columbus Statehouse On-site Interview for Perspective on Governor DeWine's Updated Mask Mandate 11 November 2020 [10 WBNS On-Site Interview 1.18 time stamp](#)

Radio

1. All Sides With Ann Fisher, National Public Radio. 9 September 2020 - Wellness Wednesday: The Science Behind Facemasks [The Ohio Channel Link to Recording](#)
2. Radio Times, National Public Radio. 17 Dec, 2014 - 40th Anniversary of Safe Drinking Water Act Special Edition. Archive and transcript available: [NPR Link to Audio](#)

Online VideoAudio Media

1. Radio Times, National Public Radio. 17 Dec, 2014 - 40th Anniversary of Safe Drinking Water Act Special Edition. Archive and transcript available: <http://tinyurl.com/pnv68ru>

Print & Online Textual

1. Reopening of American Accelerate as States Prepare to Relax Coronavirus Restrictions. Washington Post. 25 April 2020. [Link to Article](#)
2. A Comic Strip Tour of the Wild World of Pandemic Modeling. FiveThirtyEight. 13 April 2020. [Link to Article](#)
3. Should you Sanitize Your Groceries? OSU Wexner Medical Center Blog. 1 April 2020. [Link to Article](#)
4. Why is it so Freaking Hard to Make a Good COVID-19 Model? FiveThirtyEight. 31 March 2020. [Link to Article](#)
5. Is Tap Water Safe? Here's How To Tell. Women's Health. Sept 2018. [Link to Article](#)
6. When you get one wit', what are you getting?. Philadelphia Inquirer. 18 Jan 2015. [Link to Inquirer Archives](#)
7. Hydraulic Fracturing What Are the Issues? Reading Eagle. Reading, PA. 10 Sept 2014. Archive unavailable.

AWARDS

1. Faculty Service Award *Oct 2015*
Department of Public Health
College of Health Professions and Social Work, Temple University
2. Koerner Family Fellowship *Oct 2008*
Koerner Family, Drexel University
3. Teaching Assistant of the Year Award (Highly Commended) *May 2009*
Graduate Studies Office, Drexel University
4. Student Merit Award *Dec 2009*
Biological Stressors Specialty Group, Society for Risk Analysis
5. Student Travel Award *Dec 2007, 2008 & 2009*
Society for Risk Analysis
6. Graduate Assistantships in Areas of National Need (GAANN) *Sept 2006 - Aug 200*
United States Department of Education
7. Dean's Fellowship *Sept 2004*
College of Engineering, Drexel University

- | | |
|--|-------------------|
| 8. Steven Geigrich Memorial Scholarship Giegrich Family, Drexel University | <i>March 2007</i> |
| 9. Northeastern Chemical Association Scholarship Northeastern Chemical Association | <i>Oct 2005</i> |
| 10. Alumni Award Scholarship College of Engineering, Drexel University | <i>Sept 2004</i> |
| 11. Extracurricular Activities Award Geo-Environmental Sciences and Engineering Department, Wilkes University | <i>May 2003</i> |

Professional Society Memberships

- Society for Risk Analysis - Leadership outlined that that section of CV
- International Water Association
- Association of Environmental Engineering and Science Professors - Leadership outlined that that section of CV
- American Academy of Engineering Education
- American Water Works Association

Refereed Journal Board Membership

- Microbial Risk Analysis - June 2019 - current

Peer Reviewer

- Risk Analysis
- Environmental Science and Technology
- International Journal of Environmental Health Research
- Water Research
- Water Science and Technology
- Environmental Modeling and Software

Volunteerism

- | | |
|--|-----------------------------|
| • Community and High School Outreach Department of Civil Architectural and Environmental Engineering Drexel University | <i>Nov 2005 - July 2009</i> |
|--|-----------------------------|

- DHS Specialty Award Judge *June 2008*
2008 Intel International Science and Engineering Fair
- Student Ambassador *Sept 1999 - Feb 2004* Department of Admissions, Wilkes University
- Volunteer Firefighter *Jan 1997 - Dec 2008*
Weatherly Area Fire Company No. 1
