RESEARCH

RESEARCH EXPERTISE

Breast Cancer Prevention; Health Disparities; U.S. Health Policy; Health Care Institutions; Women’s Health; Comparative Health Politics; COVID-19 in Historically Marginalized Populations; HIV/AIDS Policy; Qualitative Research Methods; Comparative and Historical Research Methods; Medical Sociology; Political Sociology; Feminist Theory

My research on health services, systems, and disparities is unified by concerns about whether and how health and healthcare systems serve people of color, socioeconomically disadvantaged populations, women, and members of other structurally and historically marginalized groups. I have focused primarily on the following topics: (1) cancer prevention and cancer health disparities, (2) COVID-19 among historically disadvantaged populations; (3) comparative HIV/AIDS policy; and (4) the influence of ideas on health and social policy.

COURSE DESIGN EXPERIENCE

Advanced Topics in Health Policy: The Politics of Health Policy. College of Public Health, The Ohio State University. Designed new doctoral level course for students in public health, and other health and social sciences, to teach interdisciplinary content about the role of political processes in the design and change of health policy.

Qualitative Methods for Health Research. College of Public Health, The Ohio State University. Redesigned course during Fall 2023 as a 4-credit instead of a 3-credit course, in order to accommodate the need to teach some prominent new methods, and in recognition of the high workload involved in homework assignments and the course project.

Qualitative Methods for Health Research. College of Public Health, The Ohio State University. Designed new doctoral level course for students in public health, and other health and social sciences, to teach foundations of qualitative and multi-method research design as well as study execution, analysis, presentation, and publishing skills.

Doctoral Seminar in Health Services Management and Policy. College of Public Health, The Ohio State University.

Substantially re-designed this professional development seminar to incorporate professionalization topics, works in progress seminars featuring student work, and guest speakers working in various positions within the field of health services, management, and policy scholarship and research.

U.S. and International Health Care. College of Public Health, The Ohio State University.

Substantially re-designed upper-level undergraduate course introducing students to the U.S. healthcare system. Added emphasis on political processes and international context, interactive and active learning exercises; term-long group project comparing the responses of several national health systems to the same health challenge. Re-designed course to be coordinated by a teaching team across multiple sections, led teaching teams.
