Racism in Our Learning Environments

Researchers indicate that students’ academic and emotional growth at all levels flourishes in a safe, supportive learning environment. However, students of color often experience a different challenge on a daily basis.

Dr. Darrell Gray II, MD, along with a panel of education and health care leaders, explores the root issue of systemic racism in learning environments and its impact on the mental, physical and academic well-being of students of color. In addition, each panelist will present an action item that offers a solution to combat the negative impact of racism on our learning environments.

**Moderator:**
Darrell Gray II, MD, MPH, FACP
Associate Professor, The Ohio State University College of Medicine,
Deputy Director, Center for Cancer Health Equity, OSUCCC – James Medical Center, Healthy Communities

**Thursday, April 22**
Noon, via Zoom

**ROAAR** is a series of panel conversations featuring leaders from various sectors along with The Ohio State University health care experts addressing the issues of systemic racism. Each panelist is invited to share their expert opinion on the issue and provide one action item that will create and foster safe and healthy communities.
