Design 6500  
Spring Semester 2016  

An Interdisciplinary Co-design Experience  
Living with Type One Diabetes

The Department of Design invites graduate students from all disciplines to join us in exploring meaningful opportunities for future experience. We will bring young people living with Type 1 Diabetes (T1D), parents, and healthcare providers directly into the co-design process with us. In the first phase we will aim to understand the current experience of living with T1D. In the second phase we will use co-design (designing with the participants we learned from in the first phase) to imagine and express concepts for future experience. Together we will explore system and service concepts that could improve the lives of those living with Type 1 Diabetes.

Format  
Co-design studio with fieldwork

Participants  
Graduate students from all disciplines are welcome. Class size is limited to 16 so please enroll early.

Facilitator  
Liz Sanders, Ph.D.  
Department of Design

Class number  
DESIGN 6500-0010 (17738)

When and where  
105 Hayes Hall  
Mondays and Wednesdays 4:35 to 6:00

Questions?  
Send me an email at Sanders.82@osu.edu

We are particularly interested in hearing from graduate students in the following colleges and departments:

- Endocrinology, Diabetes and Metabolism  
- Pharmacology  
- Nursing  
- Biology  
- Medical Dietetics  
- Biomedical Sciences  
- Exercise Physiology  
- Public Health  
- Psychology  
- Social Work  
- Human Nutrition  
- Education  
- Communication  
- Fisher College of Business  
- Computer Science and Engineering

Open to all disciplines. Seeded by Design.
