2014-2015 Curriculum Guide for Master of Public Health degree program with a specialization in CLINICAL TRANSLATIONAL SCIENCE

The Master of Public Health (MPH) degree program is designed to provide students with the knowledge and skills to be practitioners of public health. It includes courses within public health’s core disciplines of biostatistics, environmental health science, epidemiology, health behavior & health promotion, and health services management & policy. This broad training is complemented by the more in-depth course work within your specialization.

Students admitted to the MPH degree program are assigned a faculty advisor who will provide guidance throughout the program. This document serves as a resource to be used by the student and the advisor in planning a program with a specialization in Clinical Translational Science (CTS) but is not inclusive of all important degree, college, and university requirements. All students are expected to be familiar with the College of Public Health (CPH) Graduate Student Handbook (available at http://cph.osu.edu/students/graduate/handbooks) and with the Graduate School Handbook (available at http://www.gradsch.ohio-state.edu/).

PROGRAM OF STUDY

The MPH-CTS curriculum consists of a minimum of 45 credits organized into five curricular domains:

1. Core courses in areas of knowledge basic to public health (16 credits)
2. CTS Specialization courses (17 credits)
3. Electives (7 credits)
4. Practicum (2 credits)
5. Culminating Project (3 credits)

Public Health Core Courses (16 credits)

Every student in the MPH-CTS program must take the following courses in areas of knowledge basic to public health:

<table>

**Grade Policy:**

In addition to the general Graduate School requirements of a cumulative grade point average of 3.0 or higher, students must meet specific college policies regarding grades in Core and specialization courses. Students should familiarize themselves with Section 11 of the College of Public Health Graduate Student Handbook.
