Hello,

My name is Brittany Yarnell, and I am an MPH student at The Ohio State University. I am conducting a research study to assist the Ohio Public Health Association (OPHA) in determining how to engage students. For this project I am asking students and recent graduates about their involvement with professional organizations in order to recommend action steps for OPHA. In order to participate you must be at least 18 years old.

The Ohio Public Health Association provides great opportunities for public health students and practicing professionals to gain experience in their field and to meet new people from the field of public health.

The survey will take approximately 10 minutes to complete and you can use either your computer or mobile device to respond. It will be available until 11:59 PM on February 26th 2016.
